ORIGIN OF THE MONROE DOC-TRINE.

During the discussion which took place in the Senate upon the presentation of the President's message, Mr. Hale gave the following brief history of the origin of that public declaration by President Monreo; which is now popularly approached this sea; that its water was known as the Monroe doctrine, and the substance of which is comprehended in the following sentence of one of his mes-

I wish, however, to state, for the benifit of the Senate and country, for a moment, what the whole of this great Monroe doctrine really is. Does the country know that it is entirely of British origin? This doctrine, which the Democratic party of the present day, so called, are going to annual temperature of the equatorial belt elevate and put prominently before the country as a great question, was a position taken by Mr. Monroe at the suggestion of the British Cabinet, and he did not take it until the British cabinet told him that they would stand up to him if he did take it.

DAVIE Co., N. C., December 29th, 1855. DEAR ARATOR: I have seen your request, that I would give a detailed account of the land, manure, and cultivation of my premium acre of corn; with which I proceed cheerfully to comply, for I am tired of answering questions on that subject

My land was surveyed; it is high, grey, post-oak land, except one-fifth of the acre, which was stiff clay land; the land was supposed to be capable of producing 8 or I0 bushels of corn. In November and Decem ber I penned 20 head of cattle on it, coultering it up one foot apart, to prevent the ma-February, I put on 52 two-horse loads of real inst., at 7 o'clock P. "IT IS FINISHED!"

The Iron horse made its first trip from Goldsborough to Charlotte last Wednesday. Thus the stupendous enterprise, chartered by the Legislature of 1848-49 has been finished. The East and West of North Carolina, are now knit together by an inseverable band of iron. When first undertaken, many shook their heads and expresse I doubts as to the success of the work. But the work did suceeed, and what a work! The Legislature of 1848-49 have erected a monument more lasting than brass, and proof against the ravages of time. The names of those who voted in its favor should be embalmed in the memory of coming generations as the benefactors of the old North State, and those against should be breathed with a sigh. It is a matter of congratulation to the Nafional Party of this country, that they have so many distinguished men who would do honor to our country by filling the highest office within the gift of the American people; but we think, and we are glad it is so, that the wave of popular sentiment is rolling towards FRANK-LIN PIERCE as the man most likely to be the recipient of the nomination of the Democratic party. 'Tis true, at one time his prospects were dark and gloomy, owing to some unfortunate local issues, but at this time, and more especially since the bold and determined stand to any upon the face of the globe. All that he has taken for our country at large, and his is needed to place the good old North State House. inflexible position for Southern Rights as set upon a level with any State on this broad forth in his late Message, we believe that he is land-overshadowed by the stars and the dered by twenty-two majority. the Know Nothings, wrongly called America have disposed to place any "confidence" in. None. They place confidence in Sam Houston, Tom Benton, and such like, who the Democrats have kicked from their ranks on account of their political treachery, men who vainly sought after the honors of the party they professed to acknowledge and bolted at lastpliant tools in the hands of Know Nethings But we claim no "confidence" from them for any adherent to the principles of the Democratic party. To accuse him of being an abolitionists is perfect folly, worse than that, it is the malicious machinations of a corrupt heart.

Under the caption of "Acting ing," the last Salisbury Herald Pierce soundly, for what, particularly, no one knows. A few weeks ago he endorsed the sentiments of the Message, but had no "confidence" in the author. In his last he says:

"When the abolitionists unite" contained in the President's Message, we really that he disapproves of that portion of the Message which he formerly approved.

This is not all, our friend of the Herald, over anxious to give a bad coloring to the state of affairs, neglected ignorantly we pressure, to state that Hale, the Abolition Sanal New Hampshire, and Wilson the black Republican from Massachusetts, another abolitionist to the back-bone, have made this same Message the object of their attacks in the Senate of the United States. Why? Because Mr. Pierce has seen it fitting to rebuke as plain as words can tell, the abolition fanaficism of the North. Do you fear the man, Mr. Herald, who Hale and Wilson fear? They fear him, hence their vituperation.

The Baton Rouge Advocate, in relation to President Pierce and the South, says:

"The unanswerable refutation of the charge of the Northern Abolitionists that the policy of the South has ever been of an aggressive character towards their section of the Union, as contained in the last message of President Pierce to Congress, will be greeted with delight by every patriot in the land. While re-ceiving the applause and thanks of all whose opinions are worth attention, the President, on the other hand, will be assailed with all the vindictive fury and fiendish malice of the followers of Seward, Greely & Co., and will bewill be hurled as furiously as were the darts of Xerxes' cohorts at the devoted Greeks when defending their firesides and families from the invading Persian. It is our duty in this event -and none can doubt its coming-to rally around and sustain our Chief Magistrate and the measures of his administration, and prove that we are not ungrateful to those who defend and stand by our constitutional rights in defiance of the howlings of fanaticism and the will dissolve the Union and unleash the hounds

Our President does not handle the important questions at issue between the North and outh with the daintiness of an off honesty of a statesman and high public officer. He does us no more than justice when he as-serts that; while we have heretofore confined our attention to our own affairs, not presum ing to officiously intermeddle with the institution of the northern States, too many of the latter are permanently organised into associations to inflict injury on our rights in property by wrongful acts, which would be cause of war between foreign powers, and only fails to be such in our system because perpetrated under eover of the Union.

For the Banner. Mr. Editor .- I am not a know-nothing, in the modern acceptation of that term. It is true that there are many things about which I know literally nothing. And I am not ashamed to bear witness to my own ignorance. For in so doing I find that I am surrounded with the very best company. The eminent Philosopher, Sir Isaac Newton, who was the most profound thinker of which any age can boast, who pushed his investigations beyond the prescribed land-mark of his day and generation, was not ashamed to acknowledge that like a child, he had been gathering a pebbles on the shore, while there was a mighty ocean of truth before him that he had never explored. I believe that it is Sheakspeare, who says a "rose would smell as sweet by any other name." There is, however, an association of ideas that are found clustered around names, in many minds, which places the name above the grade of secondary considerations. I have thought that some of the political parties both North and South, have been unfortunate—they have displayed neither wisdom nor taste in selecting the names which are the badges of distinction between themselves and others. But my intention is not to give an exposition of the merits of the different political parties. Parties of this description are multiplying upon our hands until we are likely to have no organization of Congress. But I wish to call public attention to the importance of patronizing home talents and home institutions. There is a marked difference in this respect between our State and our sister States immediately North and South. Virginia and South Carolina, are famous from the Northern lakes to the Southern gulf, for their State pride. Every thing that has the seal of these States upon it, is above par at home. But North Carolina, (much against her own interest,) has acted upon the principle that no good thing can come out Nazereth. We have as high mountains, as pure air, as rich land. as many minerals—we have as much tar, pitch and turpentine-we have as pretty ladies. as talented men, and literary institutions equal

these Institutions have been built up especially for the benefit of Western Carolina. And to the population of that portion of our State they are chiefly to look for encouragement and patronage. And if the whole West, with the heart of one man, would rally around these Institutions, they would soon be ornaments to our State and blessing to our country. They would be perennial fountains from which would issue many streams to make glad the city of our God. And under the wholesome moral and intellectual influence that would go out from these fountains, the wilderness of Western Carolina would rejoice and the "desert would blossom as the rose."

For the Banner.

INCREASE IN THE POPULATION OF TEXAS. -Texas has increased very rapidly in popul- of Superintendents ation of late years. In the year 1850 the information of the census gave it 212,562 inhabitants. At the extracts from the Law presidential election in 1852 the total vote Sessions of the Legislature cast was 18,547. As the population had increase i considerably in the period between 1850 and 1852, it must then have been near 300, 000. This would be in the ratio of about one vote to every sixteen inhabitants. If there had been no increase in the population the ratio would have been about one voter to every eleven inhabitants. At the election held recently in Texas no less than 45,547 votes were polled. Applying the first ratio to this, we should have a population of 728, 752, being three times the aggregate of the population in 1820. Taking the lower ratio the total amount would be 501.017, so that in any case, the aggregate at this time must exceed half a million. This is an astonishing increase, and evinces that Texas has grown as rapidly as Iowa.

THE HERMITAGE.—Last week, the commit tee in the Tennessee Legislature appointed to examine the Hermitage, and report what it could be purchased for, presented through the chairman two reports. The majority report states that 400, acres, including the buildings, tomb of Gen. Jackson, &c., can be purchased for \$50,000, and the whole estate for \$75,000; and recommends the purchase of the whole or a part of the property. The minority report expressed an opinion whether the State should purchase the whole or a part of the estate.

THE NORTH CAROLINA CENTRAL RALIRDAD.

We are much pleased to learn that the North Carolina Central Railroad is now completed, and that passengers yesterday came through from Goldsboro and arrived in our city by the Charlotte Railroad. This is a new era in travelling, and one that we feel sure will be a benefit to Columbia. If our interests had been properly adhered to and carried out, the Hamburg and Columbia road would now be under construction to connect with it; and we feel satisfied that at the next session of the Legislature the charter will be renewed, and the road yet be built .- Columbia (S. The news is important, as indicative of an early peace.

The Vienna correspondent of the London Times telegraphs, under date of Wednesday, the 16th, 10 A. M., that Russia has unconditionally accepted the propositions of the Allies. This is reported authentic.

The news caused an immense sensation. The funds rose three per cent., cotton a farthing, and a panic ensued in the other markets.

The actual facts are that Count Nesselrode, upon being handed the Austrian and Allied note. was informed by Count Esterhazy that he was not authorized to enter into discussion; but if the note was not accepted unconditionally before the 18th, he and all the Austrian Embassy would leave Petersburg.

To prevent this, Nesselrope will communicate with Vienna direct; and Prince Gortschakoff at Vienna had a talk with Count Boul, in which the former produced a memorandum expressing the general inclination of Russia to negotiate, but proposing certain alterations.

Count Boul received the document, but inasmuch as it did not contain an unconditional acceptance of the propositions, Austria could not reply, without the concurrence of the French and English Am-

The next day the English government published a despatch from Minister Seymour, at St Petersburg, as follows: a basis of negotiations."

This qualified announcement curted the excitement, and the alarmists begin to fear that Russia merely wants to gain time by deceptive negotiations.

THE HOG MARKET-The packing progresses slowly now, and a majority of the houses will close their peaking operations this week. The number of hogs packed around the Falls, up to last evening, was about 305,000. There was some inquiry yesterday, with a sale of 2500 bogs at \$5 25, and sales of mess pork at \$15. New bacon was selling at 8, 9, and 10 cents.

The number of hogs packed to date at Cincinnati, as we learn from the Price Current, was 355,235, which is equal to the entire packing at that point last season. Prices of hogs were at \$5 and \$5 25, though the despatches yesterday report an advance. - Louisville Courier . 11th.

THE FRUITS OF WAR. - The Albany Evening Journal publishes a list of the battles fought during the year 1855, with the number of people killed at each, begining with the bombardment of Shangahi by the French, at which one hundred fell, and ending with the fall of Kars, at which 2,600 fell; by which list it appears that seventy-three battles have occurred during the year, or more than one for each week, with an average loss of over a thousand men killed in each. This list does not include those who have fallen by disease, or in skirmishes, nor the wounded, disabled, those who died in the hospital or the amblance, or were irreparably maimed, or missing, or prisoners. The number left dead upon the field usually comprises only about one fourth of the entire loss in a battle By this rule, the entire number swept out of useful existence by the wars of 1855 must have reached over 300,000 men. The case will likely be a very tedious one. It is probable that both cases will be tried together, though that has not yet been decided.

In matters of public policy, both National and State, it will yield an unwavering support to Democratic measures, and a zealous advocacy of the Democratic cause; sustaining to the height of its ability the principles of the Balti-more Democratic platform of 1852, as agreed upon by the Party, and sanctioned by a large majority of the American People.

Against the recently organized "Know Nothing," or "Native American" movement, the Sentinel will take decided and unequivocal ground; regarding the creation of a religious test as qualification for public office, at variance with the letter and spirit of the Constitution, opposed to every principle of Republicanism, a worthy only the ignorance and intolerance of a, darker age. Acting from a firm conviction that, honesty, capability, and fidelity to the Constitution, (aside from political principle,) are suffi-cient requisites in candidates for offices under a... and advertisers will find it an excellent medium through which to make known their brainess. April 14, 1854. 32-2w.

We extract the following article from the published proceedings of the U.S. Agricultural Society at its recent session in this city.

The subject of which it treats is one of great importance to the industrial classes in this country, and well deserves the attention which it seems to elicit in different sections of the Union.

Should the expectations of the American company be realized, the advantages of this new discovery of guano deposites will inure not alone to agriculturists, but to those also engaged in the pursuits of commerce and labor. It is practically a national question. There the same. can be no good reason why the farmers of this country should pay tribute to foreign monopolists for an article of prime necessity, while onr own citizens can furnish it on the principles of free trade to all the world at less than twothirds its present cost.

We commend this subject to the attention of our readers. D. Jay Browne, esq., of the Patent Office, submitted the following paper on guano:

"This subject has become one of great interest to the American agriculturist. Under proper management it has no superior as a fertilizer in promoting the growth of grain and grasses; but especially is it valuable to the farmer in restoring the productiveness of exhausted soils.

"The quantity of guano imported into this country by the last annual returns exceeded 200,000 tons. The cost of this article to the farmer has now risen to nearly \$60 a ton This high cost in some sections of the country operates as a prohibition to its use. It is not right that this should be so. An abundant supply could be furnished by the Peruvian islands for the use of the whole world, at a much reduced rate, if the article was subjected to the just rules of trade. Unfortunately, however, the necessities of the government of Peru have led to the adoption of a system of management which compels us to pay a heavy tribute to foreign capitalists, who hold a monopoly of the guano trade.

"Under the circumstances it is important to know that a recent discovery has been made of vast deposits of guano on an island in the Pacific, of a quality believed to be equal to the best ammoniated Peruvian guano. The island is under the control of our citizens, it having been descovered by the Captain of an American whaling ship. The government has deemed this a subject of sufficient importance to justify an order to the commander of the Pacific squadron to detach one of is yessels to examine and survey the island and its product of guano, and to protect the owners in their territorial rights."

"A company has been formed in the city of New York to manage - this enterprise, and an expedition has already been sent out, the return of which will be looked for with no little anxiety by all who feel an interest in the question of agriculture. Should the expectations of this quantity and quality of this guano deposite be realized, they propose to sell it to the American farmer at the rate of from \$30 to \$40 prr ton, or at about two-thirds Pain Killer in several cases of disease and the present price of Peruvian guano.

"With such a reduction in the cost of an article of prime necessity to the cultivators of the soil, we may naturally look for a vast increase in the production of grain and in the general melioration of the economy of farm-

"The subject is one of too much importance to be treated in a cursory notice of this kind, and is only now alluded to with the ob ject of calling to it the attention of all persons interested in the subject of agriculture."

On motion, this paper was ordered to be published in the transactions of the society, ease of scarlet fever by giving one teaspoonful whose thanks were also tendered to Mr. Browne .- Union.

BURNED ALIVE .- A letter in the N. O. Picayune, dated Dec. 25th written from Lexington Miss., says:

A daughter of a very worthy gentleman, while riding on horseback to visit a neighbor, was assaulted by a negro man, who made the hellish attempt to violate her person. She strnggled in his demoniac grasp and until her strength was exhausted, until she was bruised and lacerated, when a gentleman carried the I have had several attacks, one very violent about slower inanimate cirl to her father's house. four years ago. I was attacked at three o'clock After depositing her there, he raised the alarm and the people hurried out to hunt the negro.

After depositing her there, he raised the alarm get off my bed, I sent and got a 25 cent bottle of your Pain Killer, which I commenced taking They were not long in finding him. He belonged to the Wade estate. They brought and moving about, although somewhat weak. I him into the town of Lexington, and then, in would recommend to all similarly afflicted, to the most public street chained him to a stake and burnt him alive! It is thought the young lady will not survive her injuries.

DEATH IN A SLEIGH .-- It is stated that a young lady of Cumberland county, Pa., while sleighing ont night last week, was frozen to death. She complained to her companion early in the evening of being cold. but there and with very little effort on our part; sales were being no public house near they did not stop. Soon after, on coming to a tavern, she refused to get out, saying that she felt very comfortable, and they dreve on. Arriving at home, she had to be assisted out of the sleigh, in a stupor-like manner, and shortly afterwards it in our own families, and the good effects of the expired.

The Troy papers tell a sad story. A young lady of that city was engaged to be married to a gentleman from Long Island, and the wedding day way appointed, but on account have already found out that they can cure the of the death of a brother the ceremony was postponed. Again the wedding day was appointed, when the death of a sister occasioned use for a diseased stomach and many other puranother postponement. . SARATOGA SPRINGS, Leb 20, 1852. MESSRS. PERRY DAVIS & SON-Having witnessed the beneficial effects of your celebrated cholera morbus, within a few years past, and deeming it an act of benevolence to the sufferng-prompted by the feeling of commou humanity, I most cheerfully recommend its use to such as may suffer from the within named diseases, as a safe and effectual remedy. About four years ago I used it in a case of cholera and proved an easy and effectual cure, and in many cases of rheumatism and in one case of catarrh; and sometime in December last, six of my children were taken down with the scarlet fever or canker rash, my only medicine was Pain Killer and castor oil-the Pain Killer operating to a charm in cutting the canker, and throwing out the rash, so that in five weeks my family were entirely recovered, with the blessings of a kind Pryvidence, and I do recommend the same as a safe and sure cures for the very dangerous disthree times a day, every other day, and every other day castor oil. Yours in haste, CORNELIUS G. VANDENBURG.

BROOKLYN, Conn., June 15, 1854. FRIEND DAVIS-Although a stranger to you, I take the liberty of addressing a few lines to you for the purpose of saying a few words in favor of your invaluable medicine. I have used your Pain Killer for a number of years, and for bowel complaint and burns, and in fact for pains of all kinds, I think it pre-eminent. Before I became acquainted with your medicine, I had a violent attack of dysentery, which reduced me very low, in fact my friends tho't I could not live, but by the treatment of a Botanic Physician, the best remedy I then knew, I recovered. Since then according to directions, and at 6 o'clock in the evening my bowels were regular, and I was up inculcating, to a greater or less extent, doctrines avail themselves of your invaluable medicine. I am, sir. yours respectfully, ELMER WILLIAMS.

Thousands of Living Witnesses Certify to their Neighbors from Day to Day, the Wonderful Effects of DAVIS' PAIN KILLER.

SANDUSKY CITY, Ohio, Nov. 24, 1848. Mr. J. N. Harris-Dear Sir:-Your favor ef the 28th ultimo is at hand, and in reply will say -We began selling Perry Davis' Pain Killer, small at first, but as it became known in our community, the demand increased rapidly, far beyond our expectations, and every person that hought it would come after more, and speak of it in the highest terms as a valuable remedy for all those diseases your pamphlet spoke of. From those recommendations we were induced to use medicine were immediately apparent. We have sold more of the Pain Killer than we ever have since or before of any other medicine in the same length of time; and we do not hesitate to say that it has given better satisfaction to the purchaser than any other article we have ever sold.

Keep a large supply in the West, it is just such a medicine as the people want, and they fever and ague for twenty five cents. It will cure a cold in one hour-a severe cough in one

The great Southern Weekly!

THE SPECTATOR WASHINGTON CITY, D. C.

A FAMILY JOURNAL OF LITERATURE AND NEWS FOR SOUTHERN READERS.

THE South has too long been dependent upon the northern cities for its periodical literature. The weekly newspapers of Boston, New York, and Philadelphia, have swept like a flood over that part of the nation south of Mason and Dixon's Line, many of them carrying with injurious to southern institutions. This dependence of the mass of southern readers should be thrown off-and it is believed would have been long ago, if there had been facilities in the South for the publication of first class literary papers.

AYER'S

FOR ALL THE PURPOSES OF A

FAMILY PHYSIC

There has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills — one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an apperient they afford prompt and sure relief in Costiveness, Piles, Colie, Dysentery, Humors, Scrofula and Scurvy, Colls with soreness of the body, Ulcers and impurity of the blood; in short, any and every cese where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel,

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipelas, Palpitation of the Heart, Pains in the Buck, Stomach, and Side. They should be freely taken in the spring of the year, to purify the blood and prepare the system for the change of seasons. An occasional dose stimulates the storage and and prepare the system for the change of seasons. An occasional dose stimulates the stomach and bowels into healthy action, and restores the appetite and vigor. They purify the blood, and, by their stimulant action on the circulatory system, renotate the strength of the body, and restore the wasted or diseased energies of the whole organism. Hence an occasional dose is advantageous, even them to be carried a present the circulatory with the contract of the strength of the contract of the strength of the s though no serious derangement exists; but un-necessary dosing should never be carried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a cathartic medicine. Being sugar-wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity. For minute directions see wrapper on the Box.

CONSUMPTION.

This remedy has won for itself such notoriety from its cures of every variety of pulmonary disease, that it is entirely unnecessary to recount the evidences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lengs by its use. When once tried its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, &c.; and for Children it is the pleasantest and safest medicine that can be obtained.

As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best that it ever has been, and that the genuine article is seld by—SILL & SILL, Salisbury, N. C.; KING &
